DETAILED ACTION

1. This application is a continuation of SN 10/244,365. A preliminary amendment was filed on Mar 24, 2004. claims 1-13, 15-32 and newly added claims 33-37 are pending.

2. *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 15-32, drawn to compounds, composition and method of use (+)-norcisapride, classified in class 546, subclass 224.
- II. Claims 33-37, drawn to method of accelerating intestinal cleansing using multiple active ingredients, classified in class 514, subclass various depending on species election. If this group is elected, a further election of a single disclosed combination of active ingredients with every element named is also required.

The inventions are distinct, each from the other because of the following reasons:

Merits for patentability of a single compound with specific stereoisomeric structure are independent and distinct from method of using combination of active ingredients for accelerating intestinal cleansing. The search for group I must include the elements, bonding arrangements and chemical property of the compound per se while the search for group II is not related to group I but encompassed all combination of active ingredients analogous to the active ingredients named and its quantitative relationship.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention with species election if group II is elected to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the

Art Unit: 1625

inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
